- Proficient in server-side rendering, enhancing web application performance.
- Demonstrated ability to collaborate effectively within cross-functional teams.
- Proven track record of delivering projects on time.
- Committed to continuous learning and staying updated with industry trends.

Projects

Singlecare

Client : [Rxsense](#)

Designed and implemented a free-to-use prescription discount service (SingleCare) that empowers users to save up to 80% on their medications. By negotiating directly with pharmacies, SingleCare offers significantly lower prices than insurance co-pays for tens of thousands of medications. Users can search for their medication, compare prices, and access free discount cards instantly through the SingleCare website or mobile app. These cards can be easily displayed at the pharmacy counter to redeem discounts.

Walgreens

Client : [Rxsense](#)

Rx Savings Finder Developed a user-friendly web application (Walgreens Rx Savings Finder) that empowers users to find the lowest prices on their prescription medications at Walgreens. By searching for their medication, users gain access to free, third-party discount cards easily displayed on their phones or printed/sent via email. This transparent pricing system ensures users know the lowest cost before reaching the counter, offering valuable savings to uninsured individuals or those with highdeductible health plans. By increasing access to affordable medications, Walgreens Rx Savings Finder contributes positively to healthcare accessibility.

Kroger

Client : [Rxsense](#)

Health Savings Club: Led the development of the Kroger Health Savings Club, an annual membership program offering significant discounts on thousands of popular prescription drugs. This web-based platform empowers users to save up to 85% off their medications, even if they are not covered by insurance.

Vnetra

Product

Vnetra is a Google Cloud powered, GDPR compliant, AI/ML driven back office vending management software for operators and brands to remotely track sales and manage vending machine operations at their fingertips anytime, anywhere in

the world! It is a cloud-based platform that digitizes the vending machine, allowing operators to track live inventory, monitor transactions, access refilling data, and monitor machine activities. vNetra also allows operators to create multiple users/operators that can manage the vending business from the backend. Additionally, it can be used to create promotional offers to run on vending machines.

Dairy Milk Management System

Product

Dairy Milk management System is a web-based software application to maintain day to day transaction of milk collection and sell milk products. This system is easy to operate and understand. This system collects the milk from many different sources and distribute to customer or milk buyers.
